WORK EXPERIENCES

DURATION IN YEARS / TIME FRAME

LOCATION

1.3 Jul 2019 - Today
FOUNDER - Dact

Paris, FR

Bring the features and power of git to a web rich text editor for the general public. Explored the technical feasibility, designed prototypes, collected feedback from potential users in order to design an accessible workflow.

0.7 Nov 2018 - Jun 2019
CTO - En Marche

Paris, FR

Manage a team of 10 developers, 2 data scientists and 2 product owners for En Marche, the currently ruling political party in France, created by Emmanuel Macron. In charge of the Data aspect of the campaign for the May 2019 European elections : building models of the electoral dynamics to optimize the door-to-door campaigning, leafleting and public event locations, creating services to watch the trending topics on social media, ...

3.1 Oct 2015 - Nov 2018
CTO AND COFOUNDER - Foodles

Clichy, FR

Foodles has created the first autonomous catering solution for businesses. Designed the RFID-based hardware and developed the embedded software of Foodles connected fridge. Designed the backoffice (Python Django), its RESTful APIs, the BI tools and the patron UX/UI. Managed a team of 5 developers. Filed a patent on RFID vending machines. Took part in two successful series of fundraising.

2.0 Nov 2013 - Oct 2015
PROJECT MANAGER - IMEDI

Versailles, FR

Imedi represents large European companies like Thales, Airbus, Poma or Gemalto in the FSU (mostly Georgia and Ukraine). Managed the sales of a secure telecommunication system in Ukraine, of ropeway installations, military equipment and contactless payment systems in Georgia. Size of the projects : between 2 and 100 MEUR.

0.7 Mar 2013 - Oct 2013
COFOUNDER - Fleex Travel

Paris, FR

Fleex Travel's purpose was to offer flight tickets and travel packages searchable by travel experience not by destination in exchange for a significant fare discount. Drafted the business plan, designed the sale concepts, searched for partner airlines, wrote the specifications and designed the UX/UI for Mobile/Web.

0.5 Apr 2012 - Sept 2012
DEVELOPER INTERN - Thales

Rungis, FR

Designed and developed a customization utility for the Human-Machine Interface of Thales TopSky Air Traffic Control Systems. Advanced programming in Java, Swing and XML.
